Treason

Truth Before Treason

Run
We failed to open the eyes of the masses
And now the system is primed for reaction
To any public decisions against them
It took too long to realize what was going on

The world we know is coming to an end
Our atrocities have brought us down again
Now pain and suffering is all we know
Our land is burning, there is no recovery

(Chorus) In the hour of darkness, we will fight
Traveling far away from the light
The hour of darkness consumes us all
This is the end to all we know

We try to overtake cursed lands
So much is lost, no one could take the blame for this
Our plight continues as our empire burns
There's nothing left as we carry on this way

(Chorus)

The sky is bleeding - nothing's left
Death and destruction reign
We watch our nation burn to the ground while death prevails
This broken empire has failed

(Chorus)

As death approaches, we regret
Looking back, but it's too late
This broken empire shall fall
No could ever return to their homes (woah)
This empire has failed
This broken empire lays in ruins
Between the smoke and the ash that we've left
This nation lies before us all
