

Astrogirl

Suede

A strange relationship has started
A strange relationship indeed
It's like a watercolor forming
Between the pages of a dream And it's calling you
It's calling me
It's calling everyone to be In a future world with an astrogirl
One on one is all you need
In a future world with an astrogirl
One on one is all you need A strange experience has started
Between her molecules and me
It's like two seas between us forming
From obsolete technology And it's calling you
It's calling me
It's calling everyone to be In a future world with an astrogirl
One on one is all you need
In a future world with an astrogirl
The sky goes on and on for you and me The sky goes on and on for you and me
The sky goes on and on for you and me In a future world with an astrogirl
There'll be no obstacles, you'll see
'Cos we'll be making friends with the supermen
The sky goes on and on for you and me The sky goes on and on for you and me
The sky goes on and on for you
The sky goes on and on
