

# R-evolve

## 30 Seconds To Mars

A revolution has begun today for me inside  
The ultimate defense is to pretend  
Revolve around yourself just like an ordinary man  
The only other option to forget  
Does it feel like we've never been alive?  
Does it seem like it's only just begun?  
Defy yourself just look inside the wreckage of your past  
To lose that all you have to do is lie  
The policy is set and we are never turnin' back  
It's time for execution, time to execute  
Time for execution, time to execute  
Does it feel like we've never been alive?  
Does it seem like it's only just begun?  
Does it feel like we've never been alive inside?  
Does it seem like it's only just begun? It's only just begun  
The evolution is coming, a revolution has begun  
The evolution is coming, a revolution has, yeah  
The evolution is coming, a revolution has begun  
The evolution is coming, a revolution has, yeah  
Revolution, revolution
