

# Sword of Light

## Dismember

O I am the light and the savior, I am the one who brings death to mankind  
The bringer of silence, the source of  
life, hammer of justice, sword of light  
Conflict will end uneasy peace, humanity's finest destructive art  
Winds of war tear the world apart  
Nations will crumble and new will arise, rising from the ashes "the one"  
emerge  
Written in blood history repeats itself, again and again in a ravenous purge  
Strong defeat the weak, we're  
always at war  
There is no peace has ever been, man killing man  
Sword of light, burning bright, hand of doom, death to you all
