

# Can't Slow Down

## Foreigner

Feel the blood rushin' through my veins  
Baby it's not because I'm ready to blow  
Standin' still doesn't work for me  
Takin' my shot  
I've got places to go Once you get just a little taste  
And you feel the heat coming on strong  
There's no way you're turning back  
Oh I've got to keep moving on Do or die, any day or night  
My eyes stay on the prize  
With the road underneath my feet  
I'm learning how to fly I can't slow down  
I'm on the run, chasing down the dream  
I won't slow down  
I need some room, to roam, to breathe  
And no matter how the world may change  
It's the fire inside, a burning flame, no  
I won't slow down  
I can't slow down Take a chance, time to make a change  
Hit while it's hot, I got nothing to lose Taking one day at a time  
Want to see it all come true Do or die, any day or night  
My eyes stay on the prize  
Keep the world underneath my feet  
I'm learning how to fly I can't slow down  
I'm on the run, chasing down the dream  
I won't slow down  
I need some room, to roam, to breathe  
And no matter how the world may change  
It's the fire inside, a burning flame, no  
I won't slow down  
I can't slow down Woah Yeah I can't slow down  
I'm on the run, chasing down the dream  
I won't slow down  
I need some room, to roam, to breathe  
And no matter how the world may change  
It's the fire inside, like a burning flame  
I won't slow down  
I can't slow down,  
I can't slow down
