

# Phantom Bride

## Deftones

inside of this all you create  
you hide from yourself  
you separate every belief  
that is true and you spend your life  
attached to this poison  
you dont feel anything out of the way  
and its true that you spend your life trapped in this void  
where you will stay always get rid of this part riding you  
the same cold space  
you dont want to feel anything new  
you decided to spend your life  
safe from emotion  
this way youll never be harmed again  
or confused now you spend your life trapped in this void  
where you will stay always  
you waste your life relaxed in your void  
where you will drain all of you (kickass guitar solo) you spend your life stuck in your void  
where you will stay always  
you waste your life relaxed in your void  
where you will stay always you spend your life trapped in your void  
where you will stay always
