Come Down

White Lies

Felt love last night
For the first time in a long time
Feels like coming home to stay
Like falling in the sea
When it's too hot in the sun
Made things so much worse today
I know you said you'll miss me
Well, I know that you won't
'Cause time is like a wave
That washes all the pain away
When you come down
I know I said I'll see you
When it gets to new year
But now that all the rain stopped falling
All I think is getting out of here
Felt love last night
For the first time in a long time
Fells like I never went away
Like drifting back to sleep
When I'm aching and I'm tired
Made me feel so much worse today
I know you said you'll miss me
But I know that you won't
'Cause time is like a wave
That washes all the pain away

When you come down
I know I said I'll see you
When it gets to new year
But now that all the rain stopped falling
All I think is getting out of here
I know I'll be welcomed but tell me how far
[Incomprehensible]Better be good enough for you or for me
I've buried my pride, I've buried my key
I know I'll be welcomed but tell me how far
[Incomprehensible]Better be good enough for you or for me
I've buried my pride, I've buried my key
I know you said you'll miss me
But I know that you won't

'Cause time is like a wave
That washes all the pain away
When you come down
I know I said I'll see you
When it gets to new year
But now that all the rain stopped falling
All I think is getting out of here
