

Dead Roses

Blu Sanders

Beg and pleading
Why don't you feed another lie
You can climb all your fences
But nothing's gonna keep you high
(So far nothing's working)
Nothing's working
(I've seen love die)
It's falling out
Hate your beautiful way
We live in your game
Your days getting closer
And all love completely erased
We run from the plague
That you keep right beside you
So close to you
Just give me the feeling
Something that'll take me on a ride
To all the familiar places
But still a good place to hide
(So long, nothings worth it)
So not worth it
(I scream, you try)
To hold me down

Hate your beautiful way
We live in your game
Your days getting closer
(Closer! Closer!)
And all love completely erased
We run from the plague
That you keep right beside you
So close to you
Hate your beautiful way
We live in your game
Your days getting closer
(Closer! Closer!)
And all love completely erased
We run from the plague
That you keep right beside you

Hate your beautiful way
We live in your game
Your days getting closer
(Closer! Closer!)
And all love completely erased
We run from the plague
That you keep right beside you
So close to you
(So close to you!)
