

Dark On Me

Starset

There's no hate, there's no love
Only dark skies that hang above
I call your name as I walk alone
Send a signal to guide me home
Light the night up, you're my dark star
And now you're falling away But I found in you, what was lost in me
In a world so cold and empty
I could lie awake just to watch you breathe
In the dead of night, you en-dark on me You're the cause, the antidote
The sinking ship that I could not let go
Who led my way and disappeared
How could you just walk away and leave me here?
Light the night up, you're my dark star
And now you're falling away But I found in you, what was lost in me
In a world so cold and empty
I could lie awake just to watch you breathe
In the dead of night, you en-dark on me I can't do this on my own
You're all I've got to guide me home I could lie awake just to watch you breathe
In the dead of night, you en-dark on me
Dark on me, dark on me, dark on me
Dark on me, dark on me I could lie awake just to watch you breathe
In the dead of night, you en-dark on me
