One More Time Around

Sense Field

I think it's safe to say, there's a place where we all stay
There's a time when we all know, it's a place where we all go
It's where we all came from
We play in the warmth and the light of the sun
Laugh so hard we cry
Walking high-wires across the sky
One more time around the world
Before I leave this place forever
So I can see your face again
Now I think it's safe to say, we'll see each other again someday
In a place where we all know, It's a place where we all go
It's where we all come from
We play in the warmth and the light of the sun
Laugh so hard we cry
Writing our names across the sky
One more time around the world
Before I leave this place forever
So I can see your face again
One more time around the world
Before I leave this place forever
So I can see your face again
It may be our last time together
One more time around the world
One more time around the world
