

Lifter

Lifter

Down a road less traveled
And I see my purpose in front of me
And it's simple and It's gentle I found
Down a road less traveled
And I feel my conscience running deep
And it's simple but it's mental I found
And I'm never looking back
No I'm never looking back
No I'm never looking back again
We all fall down
Time keeps changing
We all will hit the ground
Down a road less traveled
And I see my world beneath my wings
And it's simple but it's crippled I found
Down a road less traveled
