

# Astronomy

[Chris Stamey](#)

Lying on a field of grass  
Watching as the clouds go past  
Emptying the hourglass of time  
High above the atmosphere  
Watch the satellites draw near  
Then they ricochet and ...away  
And I don't know why  
I don't know why  
You were close to me and then  
Gravity would pull you in  
Until there's no escape from where we lie  
Cork and charr are our 2 friends  
With no beginning and no end  
...over but I see them in the sky  
And I don't know why  
I don't know why  
In our astronomy  
Scattered and strange  
In our astronomy  
Far out of range  
You were close to me and then  
Gravity would pull you in  
Until there's no escape from where we lie  
And I don't know why  
I don't know why  
And I don't know why  
I don't know why.
