

# (I Am) The Love Skeptic

## The Lonely Forest

He sees a bird, she sees a complex pattern  
He's seen lust, she tries to see love  
You hear this song, I feel it deep within my heart  
Just chemical, animal sound We'll never know if ignorance is belief  
Only in our dreams can we perceive  
Reality and fiction became too, too good of friends  
And the bullshit, it never ends, it never ends Just let 'em speak, he's got a good point brother  
Can't you be close and disagree ever We'll never know if ignorance is belief  
Only in our dreams can we perceive  
Reality and fiction became too, too good of friends  
And the bullshit, it never ends, it never ends Became too good of friends  
And the bullshit, it never ends, it never ends, let go  
In our dreams can we perceive reality  
And fiction became In our dreams can we perceive  
Reality and fiction became too, too good of friends  
And the bullshit, it never ends  
Became too good of friends and the bullshit, it never ends
