

# Wagon

## Flagship

Fall off the wagon for the day  
I know you need it  
Fall off the wagon  
We're all safe from suffering And I'll try to look beyond the faults  
To love while our hearts get swept away Caught in the thoughts of yesterday  
I know you feel it  
Rise up from deep within  
They call it suffering And I tried to look beyond the faults  
And I'll die if your heart has turned to gray Hold it, again  
Hold it, again Brace yourself for it  
You've got a lot to tell not where you're going  
Off your face Hey, brace yourself for it  
I've got a lot to tell not where I'm going  
On my face Missing my chance  
Missing my chance
