Mona Lisas

Sister Hazel

Why'd you have to be
Everything to me
I can't believe what's falling from your mouth
Why'd you have to go and
Tell me that you know
This ain't gonna work out like we planned
If we survive the winter
We might be around for spring
If I survive myself
I'll survive anything[Chorus]
She says we're like Mona Lisa's
Shattered on the ground into
A million little pieces
It's gone and gone around so long
I don't know what we're doin' anymore
Or what we're fighting forWhere's this common promise
Is this just another one of your demons
Paroling doubts on me
Cause I had my hopes up
And I let my guard down
Baby I let you in
I can't do that again
If we survive tomorrow
You know its just another day
If we survive each other
We might find a way to stay[Chorus]
She says we're like Mona Lisa's
Shattered on the ground into
A million little pieces
It's gone and gone around so long
I don't know what we're doin' anymore
Or what we're fighting for
What are we fighting forHow I messed up was
When I let you be my everything
Its been broke now there's
Nothing left from everythingShe says we're like Mona Lisa's
Shattered on the ground into
A million little pieces
It's gone and gone around so long

I don't know what we're doin' anymore...[Repeat Chorus]
