

Heaven Nine Eleven

Tesla

Tell me why there so much pain today
'Cause taking lives is for the gain or so they say
I can't believe it but they feel this way
And that's the way of the world
Tell me why it takes a tragedy to see
To wake us up and bring us down on to our knees
With all the people suffering with disease And that the way
That's the way
That's the way of the world As the world crashes down
Heavens looking better everyday
As the sun burns the ground
There's got to be another way
If I die looking down
I get to fell everybody's pain
As the world crashes down
Heavens looking better every day Teach the children what means to love
Show them why that we can never give enough
'Cause what together we can rise above And change the ways
Change the ways
Change the ways of the world As the world crashes down
Heavens looking better everyday
As the sky turns the ground
There's got to be another way
if I die looking down
I get to feel everybody's pain
As the world crashes down
Heavens looking better every day (Heaven ow!) As the world crashes down
Heavens looking better everyday
As the sun burns the ground
There's got to be another way
If I die looking down
I get to feel everybody's pain
As the world crashes down
Heavens looking better every day As the world crashes down
Heavens looking better everyday
As the sky turns the ground
There's got to be another way
If I die looking down
I get to feel every body's pain

As the world crashes down
Heavens looking better every day(Heavens looking better now) x3
