

# Ready to Explode

## Vulcano

You can not wonder what's up to begin  
Seein' in the streets the missiles appear  
Beside your house, they put an airbase  
Nuclear guns, ready to explode You're just watching, don't know what to do  
The ones who have the power, are above you  
And briefly they'll get, your life to lose  
See the human race, wasted from the earth
