Death By Love

Dio

One night when the stars were right
For the gypsy queen
And she found she could drog you down
To a place that's in - between it all she's a
Madman with a delicate hand and evil eyes
And I've heard she'll only say a word
And that's enough to satisfy
Don't ask why
Don't even think about it
Brave men die
But what a way to go
She's not above
Death by love
One spell from the wishing well
And you're nevermore
Bad start for the sacred heart
Cause the end has come before the beginning
Knee deep in the darkest sleep
But the eyes see all
So high you could break the sky

And never feel the fall to come
Strong men die
But what a way to go
She's not above
Death by love
Don't ask why
Don't even think about it
Brave men die
But what a way to go
You've got symptoms of
Death by love
She's not above
Death by love
Don't ask why
Don't even guess about it
All men die
But this is death by love
