Quantum Theory

Jarvis Cocker

Last night I slipped through time to a parallel delusion
You were alive and happy
Our children played in trees, were strong and wise and knew no fear
We watched them play togetherSomewhere everyone is happy
Somewhere fish do not have bones
Somewhere gravity cannot reach us any more
Somewhere you are not aloneThis morning, when I awoke
God was dead but I lived on
I cannot move, but I am free
I found the source of gravitySomewhere everyone is happy
Somewhere fish do not have bones
Somewhere gravity cannot reach us any more
Somewhere you are not aloneSomewhere in a parallel dimension
Happening now but not within your sight
The force that binds the universe together
Everything is gonna be alrightEverything is gonna be alright
Everything is gonna be alright
Everything is gonna be alright
Everything is gonna be alrightEverything is gonna be alright
Everything is gonna be alright
Everything is gonna be alright
