

Spiders

Space

In twenty years from now

I want to be nowhere

I live life day by day

Just sitting in the same chairIf it wasn't for you I'd have taken root

You gave me a brand new meaning

An extra season

And all of this from a girl who'sScared of the spiders

And she's scared of the dark

She's scared of the bogeymen in the park

But if anybody comes near me

I know she'll cut their balls offThey wrote a book about her

It's taken the place of the Holy Bible

I'd send her to the stars

But the Universe couldn't handle that egoIf it wasn't for you I'd have taken root

You gave me a brand new meaning

An extra season

And all of this from a girl who'sScared of the spiders

And she's scared of the dark

She's scared of the bogeymen in the park

But if anybody comes near me

I know she'll cut their balls offScared of the spiders

And she's scared of the dark

She's scared of the bogeymen in the park

But if anybody comes near me

I know she'll cut theirIf anybody comes near me

I know she'll cut their

If anybody comes near me

I know she'll cut their balls off
