

Four More Years

[**Rich Aucoin**](#)

This, this is the start.

We only just got here and soon we'll part. But we still got four more years

Four more years You, you're only here so long,

Feels like I just met you and now you're gone.

And I, I'm alone so much.

What good are friends you cannot touch? While we still got four more years

Four more years Friends, they always grow.

But the more you meet, the less you'll know.

And I, I fucking miss my friends.

I gotta tell you guys before it ends That we still got four more years

Four more years

(Four years, four years)
