Should Have Been

We Shot The Moon

I am lost in a croud
I am all turned around
Your salt in the wound that hasnt healed
You were near now your far
So now we missed the mark
And the road back to you is no more
I think im just dead to you woah
The signals not coming through no
So this is goodbye to you (goodbye to you)
What should have been
Could have been
A happy end
Say it slowly
I might have been
The best of them
I didnt win
The saddest story I know
My enemy is the life you cant see
And the days turn to years there is no cure
I think im just dead to you woah
The signals not coming through no
So this is goodbye to you
What should have been
Could have been
A happy end
Say it slowly

I might have been
The best of them
I didn't win
The saddest story I know
Gonna get you now
Gonna get you now
Ill find a way to win you back
You refuse to beleive
In a life
Spent with me
Whos to blame
I know ive done this before

What should have been
Could have been
A happy end
Say it slowly
I might have been
The best of them
I didnt win
The saddest story
What should have been
Could have been
A happy end
What should have been
Could have been
A happy end
The saddest story I know
