

# Straight Ahead

David Cook

I've got questions for you  
You've got answers untrue  
I can walk these circles all night long  
Take a pill and sleep off  
Everything you can think of  
Walking all these circles to a song  
Could you play me something new?

So take a minute just to breathe  
And think of everything you wanted  
And what you got instead  
Is it a labor just to see  
Around the left, the right, over my head  
To straight ahead

Find a new way to feel right  
Between this time a fistfight  
I can read the circles 'round your eyes  
This is life, this is no rhyme  
Find a beat, find the right time  
To organize the circles to a song  
Could you play me something new?

So take a minute just to breathe  
And think of everything you wanted  
And what you got instead  
Is it a labor just to see  
Around the left, the right, over my head  
To straight ahead, yeah

So take a minute just to breathe  
And think of everything you wanted  
And what you got instead

So take a minute just to breathe  
And think of everything you wanted  
And what you got instead (what you got instead)  
Is it a labor just to see  
Around the left, the right, over my head  
To straight ahead, yeah
