For the Life of Me

Thompson Square

Baby you're outta my league
I'm so like an old farm pick up truck
And you deserve a limousine
Baby can't believe you're with me
Cause I'm more like an old Andy Griffith show
And you're so sexy and a city soulFor the life of me, I'll never figure out
What you see in me, baby why you hanging around
Just what it is that keeps us together
Cause we both know, you can do better
For the life of me, till the day I die
I'll be waking up every morning wondering why
Right by my side is where you say you're always gonna be
For the life of meHoney, you really got it all wrong
You might be a little bit outta tune
But you're still my favorite song
Honey, you got it upside down
I feel like I won the lottery
The day you rolled into townFor the life of me, I'll never figure out
What you see in me, baby why you hanging around
Just what it is that keeps us together
Cause we both know, you can do better
For the life of me, till the day I die
I'll be waking up every morning wondering why
Right by my side is where you say you're always gonna be
For the life of meSo let's just agree to disagree
Cause I was made for you and you were made for me
The rest don't matter
It don't matter anywayFor the life of me, till the day I die
I'll be waking up every morning wondering why
Right by my side is where you say you're always gonna be
Yeah right by my side is where you say you're always gonna be
For the life of me
For the life of me
