Love Is a Rock

REO Speedwagon

My love is a rock, an immovable force
Anywhere that you are my love is right here
With any tick of the clock life can change its course
But my love will not, my love is a rockHeaded out into uncharted waters
What you feel is your only guide
And each step that you take brings you closer
Just trust what you feel inside'Cause somethings telling you to keep on going
Telling you that your aim is true
Could be the voice of reason or just blind devotion
Whatever it is its calling out to you, singin'My love is a rock, an immovable force
Anywhere that you are my love is right here
With any tick of the clock life can change its course
But my love will not, my love is a rockMixed messages shoot through a wire
Tender turmoil in your voice
Change is spreadin' through you like a fire
Bridges are burning, you made your choiceAnd as youre searching for peace in your world
You may find yourself spinning around and around and around
While the pain youve endured only serves to make it surer
Of the strength that you have found and thenMy love is a rock, an immovable force
Anywhere that you are my love is right here
With any tick of the clock life can change its course
But my love will not, my love is a rockYou may not be looking for love
But love may find you
May choose to close your eyes and run
You may leave love far behind youIn your eyes, I can see the future
In your heart, I can always trust
In your mind, I will live on forever
In your arms, I will turn to dustThese are feelings like I have never known
The song of my very soul
I can no longer silently sing it
I wanna take it to the mountain and let it roll, singin'My love is a rock, an immovable force
Anywhere that you are, my love is right here
With any tick of the clock, life can change its course
Some things are here and then gone before you know
Some things disappear without a chance to grow
But my love will not, my love is a rockMy love is a rock, an immovable force
Anywhere that you are my love is right here
With any tick of the clock life can change its course
But my love will not, my love is a rockMy love is a rock, my love is a rock

My love is a rock, an immovable force
My love is a rock, ooh, my love is a rock, baby
My love is a rock right here
My love is a rockMy love is a rock, ooh, my love
Ooh, my love, my love is a rock
My love is right here
My love is a rock
