

Epoch Coda

Emarosa

This time we heal the wounded; We fail again
I'm falling down with regret
Look away from everything and tell me what you see
There's no coming back from here
Everything I'll be
I am everything I ever was, walk away from everything I am
It's all around me
I'm not looking back where everything was so familiar
But so far away
Oh my there is no ending, I can't escape from this anymore
Oh God there's no way out of here (the walls are closing in)

Everything I've ever loved is gone
Take this for what it's worth, I've found there is no meaning
This is the end of me and I'm not holding back
The worst is over
There's no tomorrow
This is your way out
My God you lost a world you tried to make us love
We haven't seen the world since you took our bodies
And led them to the skies
As it carries us away, I can feel his hands as they pull me in
By your grace, God, let me fly
