

# Thermonuclear Devastation

## Onslaught

It steps out of its vessel and stares in horror  
This planet stinks it stinks of death

Thermonuclear devastation of the planet earth  
Piles of rubble where cities once stood  
Flesh decaying where men once fell

Thermonuclear devastation of the planet earth  
Piles of rubble where cities once stood  
Flesh decaying where men once fell

A last glance the barren waste  
Artificial disease strikes the visitor down
