

Lost at Sea

Eisley

Sailing over wave and tide
Fantastic waves against our sides
And I'm not so afraid
Lost at sea, as I should be
And I'm not so afraid
Lost at sea, you and I, you and me
Congratulations cause we've made it
All the way home, all the way home
And you know that until the stars fall
I'll always love you, I'll always love you
The mystery of salt and sea
Has never been intriguing to me
But the sea green is set so beautiful against your thoughtful face
That I must close my eyes and turn my face
Congratulations because we've made it
All the way home, all the way home
And you know that until the stars fall
I'll always love you, I'll always love you
