

# Trigger

## Fox Stevenson

Hold up just stop for a minute please  
I didn't catch your drift  
More death than legs on a millipede  
And you call it a gift I've been waiting for so long  
Waiting to hold on So keep your ears to the ground  
Cause twenty-million miles will never hold me down Forget about choices just get to it  
Blame it on the voices that told you to do it  
You got a revolver and some bullets  
Reach for the trigger and pull it Reach for the trigger and pull it Reach for the trigger and pull it Forget about  
choices just get to it  
Blame it on the voices that told you to do it  
You got a revolver and some bullets  
Reach for the trigger and pull it Reach for the trigger and pull it Hold up just stop for a minute please  
I didn't catch your drift  
More death than legs on a millipede  
And you call it a gift I've been waiting for so long  
Waiting to hold on So keep your ears to the ground  
Cause twenty-million miles will never hold me down Forget about choices just get to it  
Blame it on the voices that told you to do it  
You got a revolver and some bullets  
Reach for the trigger and pull it
