Made of Metal

Iron Savior

[Bio-unit and machine are no longer fighting each other. They are one of a kind, a unique lifeform of man and machine. And so the Savior will return to protect and serve his children...]Out in the void of the vast
Throughout the torrents of time
Millenniums I had to outlast
Alone in this heart of mineBuilt and designed to obey
To keep man alive
Oh, I have failed
Now they struggle to surviveForever free
Free from the split in my mind
Now I can see
My eyes have been blind
The way of the ways - the line of the lines
My destiny once and for all
Oh Atlantis, I hear your callI am the one - you are the ones
I will protect you - my brothers and sons
I have returned - to fight this battle
I am the savior - my heart is made
Made of metalA shadow from somewhere beyond
Is reaching out its claw
Twisting the rays of the sun
My children you ain't gonna fallI'll raise my blade
The time for reprisal is here
It's not too late
The savior is here
The ancient machine - a million lifes' dream
Protect and serve you all
Oh Atlantis, I hear your callI am the one - you are the ones...[Solo Piet]Forever free...I am the one - you are the ones...
