Your Light

Russ Dixon

When you're trying to figure out who you are
It's easy to get insecure
Everybody's looking over their shoulders
You try, try to be just right
And you feel so off sometimes
What would you say if I told you

You are what you always imagined
You could be, see it
All you need is to believe it
You're already illuminated
So burn bright
The world needs your light
Your light
Your light
Yeah

When you're stuck in the stress of the day to day
Remember, through your faith
It's never more than you can handle
And when you keep the light from getting dim
You may not quite blend in
And you are a burning example

You are what you always imagined
You could be, see it
All you need is to believe it
You're already illuminated
So burn bright
The world needs your light
Your light
Your light
Yeah

Follow the beacon that's guiding you
Feel the light that comes shinin' through

You are what you always imagined
You could be, see it
All you need is to believe it

You're already illuminated
So burn bright
The world needs your light
Your light
Your light
Yeah
