Into the Future

Primal Fear

Faster and faster I march on my way
For me there's no limit to see
Harder and harder I push to succeed
I live at the highest degreeToo many years I have wasted
To live in the past
I've started to move and I'm doing fast
I'm riding into the future
I'm out of hiding again, ready to flyBreaking through boundaries
Destroy what confines
A will that is made out of steel
An immortal trust
To what's right and what's wrong
I warn you do not cross my wheelTo many years I have wasted
To live in the past
I've started to move and I'm doing it fast
I'm riding into the future
I'm out of hiding again, ready to fly
