

Keep Away from Other Girls

Helen Shapiro

A hundred times or more
You used that line before You gave me everything that a girl could want
In that small restaurant
A hero sandwich and a glass of wine
A smile, a joke and oh, such a great big line You better keep away from other girls
Keep away from other girls
Dont break my heart, just to be smart
You gotta keep away from other girls You told me everything that I longed to hear
Mixed my dreams with instant cheer
Gave my world such a rainbow shine
A smile, a joke and oh such a great big line You better keep away from other girls
Keep away from other girls
Dont break my heart, just to be smart
You gotta keep away from other girls A hundred times or more
You used that line before When you were close to me in that corner booth
Was it love? Now tell the truth
You held me closer than a clinging vine
A smile, a joke, a smile, a joke, and oh such a great big line You better keep away from other girls
Keep away from other girls
Dont break my heart, just to be smart
You gotta keep away from other girls You gotta keep away from other girls
Keep away from other girls
Dont break my heart, just to be smart
You gotta keep away from other girls A hundred times or more
You used that line before
