

I Don't Really Like You

[Skye Sweetnam](#)

I know what you're trying to do
Make me fall for you
Oh I, I want you to leave
Leave me alone Everywhere I go
You'll always be there
Tried to give you hints to leave
But it's like it came out the other ear I don't care what you do
I don't care about you
I don't care, get a clue
'Cause I don't really like you
I don't really like you You and your friends are dense
You don't make any sense
It's all at your expense
'Cause I don't really like you
I don't really like you Why have you done this to me
You know I'm busy
Oh I, I've been nice so far
But I can't take it anymore Time passes by
And you wonder why
I'm not gonna lie
You mean nothing to me I don't care what you do
I don't care about you
I don't care, get a clue
'Cause I don't really like you
I don't really like you You and your friends are dense
You don't make any sense
It's all at your expense
'Cause I don't really like you
I don't really like you 'Cause I don't really like you
'Cause I don't really like you
I don't really like you Time passes by
And you wonder why
I'm not gonna lie
You mean nothing to me I don't care what you do
I don't care about you
I don't care, get a clue
'Cause I don't really like you
I don't really like you You and your friends are dense
You don't make any sense

It's all at your expense
'Cause I don't really like you
I don't really like you
