## **Evil On Queen Street**

## Dio

Spent the night on the road And never saw the miles go Running away

I've got to get free from myselfNow stories were made to be told

And here's the one that I know

Oh, I can't hide it anymore

There's evil on Queen Street

Some evil up the roadI saw the house in the dark

It seemed to say, "Come touch me

I've got a heart

Open the door to my soul"Climb to the top of my stairs

And look into my windows

I can be your wishing well

There's no evil here on Queen StreetLet me in

I can warm in the heat of your fire

It's no permanent sin to be bad

If you're sorryLet me go

You're a promise that comes from a liar

I don't know

If I ever can wash all the evil away, heyStruck a match at the dark It screamed, "No, no I love you"

Together we're strong

You always believed what I'd say, heyBut now the heat of a flame

Starts me to remember

There's no evil, no more evil

No evil on Queen StreetJust some smoke up in the air

No evil, no evil
