

# Blur

## Roads of Glass

sand and dust fill my throat as the harsh rays pour down  
I smell iron in the air as the blood drips down my  
hair my last recollection provides nothing  
primal forces kick in survival is the bottom line

my comrades tend to escape deaths claws but not this time  
you thought we would change but not this time  
they said we play games but not this time

death comes for us all in the end so don't fall victim to the hands of these trends  
start living life there ain't nothing left i am so sick of spoon feeding the deaf  
they control us through the TV and meds this makes it harder to get out of bed  
that's why these kids all resort to the lead but to you maybe we're better off dead

I guess I've always known my place a wolf amongst vultures separated by my own damn race  
vicious and precise you can feel the bite the fire burning transform, take flight charred by defeat conditioned to  
deceit shed the dead weight no affliction i  
can't relate  
this can't be forced time will tell no debate(x2)

rose gold plated dreams none of them are who they seem  
stuck in a dream never reality you ask why we scream  
you're obviously not on our team  
they only hear what they see

i'm under constant fire to become who i'm supposed to be  
they don't give a fuck about me they only hear what they see  
its plain as fuck to see i'm out of my mind  
I've got the blade tucked wait hold up lets rewind

where the fuck am i why now? why here? i just want to feel safe  
but now I've lost my grip on the wheel  
blurry lines fade away  
take me back before i swore to keep score  
before a callous was formed before a deadking was born

I guess I've always known my place a wolf amongst vultures separated by my own damn race  
vicious and precise you can feel the bite the fire burning transform, take flight charred by defeat conditioned to  
deceit shed the dead weight no affliction i  
can't relate

this can't be forced time will tell no debate
