Cold Pill (feat. Domonic)

Tabrill

Hold still, I'll be your safety
Mid-day and bled (?)
You gone and played me
Eyes drawn, am I mistaken
You told all your freinds you weren't taken

No more sailing on your own
Take you where you'll never go
You don't have to be alone
Take you where you'll never go

You needed more than love
(Give me more than love)
You needed more than love
(Give me more than love)
You needed more than love
(Give me more than love)
You needed more than love
(Give me more than love)

It's a cold pill that you've been taking
It gave you the smile you've been faking
Found it (no sides, numb, no pain?) (?)
But inside, you just fell away

Love, love, love
Love, love, love
You give me more than love
(Love, love, love)
You give me more than love
(Love, love, love)

You needed more than love
(Give me more than love, love, love)
You needed more than love
(Give me more than love, love, love)
You needed more than love
(Give me more than love, love, love)
You needed more than love
(Give me more than love, love, love)

You needed more than love
(Give me more than love, love, love)
You needed more than love
(Give me more than love, love, love)
You needed more than love
(Give me more than love, love, love)
You needed more than love
(Give me more than love, love, love)

Love, love, love
Give me more than love
Love, love, love
Oh, give me more than love
Love, love, love
Oh, give me more than love
Love, love, love
