

Lipstick and Bruises

Lit

Kiss me on the way up
Kick when I fall down
Under the radar
Stick me in the lost and found
Lipstick and bruises
Up and down
This is what you always wanted
It's what you asked for
This is what you always wanted
And now you want more

Now these are all your new friends
Baby you're a rock star now
Runnin with the devil
Kiss me when the lights go down
Lipstick and bruises
Up and down
This is what you always wanted
It's what you asked for
This is what you always wanted
And now you want more

Kiss me when the lights go down
