

(I Could Never) Give You Up

Roxette

I could never give you up
The way you make my true love shine I've been hiding, lost in the love of another
I've followed the moon and a song
And I thought it would take me forever
To find a place where I belong I watch a rainbow rise
I give you all I've got I could never give you up
The way you make my love shine
I could never give you up
The way you make true love shine I believe you when you say you don't want to be lonely
I'll carry your heart like a bridge
When you need all the time you can find
To get the hurt out of your mind I'll watch the rain go by
And give you all I've got 'Cause I could never give you up
The way you make my love shine
I could never give you up
The way you make true love shine
I could never give you up Give you up
I could never give you up, give you up
I could never give you up, give you up I watch a rainbow rise
I give you all I've got I could never give you up
The way you make my true love shine
I could never give you up
The way you make my true love shine I could never give you up
The way you make my love shine
I could never give you up
The way you make true love shine I could never give you up
The way you make my love shine
I could never give you up
The way you make true love shine The way you make true love shine
The way you make true love shine
I could never give you up
