

# Everything There Is to Know About You

[Mark Wills](#)

What stations are the buttons of your radio on?  
Do you sleep late on Saturdays or get up at dawn?  
Do you prefer fiddles or violins?  
And have you given any thoughts to how a lifetime of love begins? I want to know everything there is to know  
About what turns you on, what you like and what you don't  
Tell me all your secrets, all your hopes and wishes too I want to be everything you ever want  
So I'm gonna need something to go on  
I mean to make your every dream come true  
So I want to know everything there is to know about you Do you like walking underneath the moonlight?  
Is there some kind of magic that'll make the moon right?  
How many kisses, how many stars  
I'm determined to keep trying 'til I find the way to your heart? I want to know everything there is to know  
About what turns you on, what you like and what you don't  
Tell me all your secrets, all your hopes and wishes too I want to be everything you ever want  
So I'm gonna need something to go on  
I mean to make your every dream come true  
So I want to know everything there is to know about you And the serious stuff and the light hearted  
Look in your eyes and I'm just getting started I want to know everything there is to know  
About what turns you on, what you like and what you don't  
Tell me all your secrets, all your hopes and wishes too I want to be everything you ever want  
So I'm gonna need something to go on  
I mean to make your every dream come true  
So I want to know everything there is to know about you  
Well now, I want to know everything there is to know about you
