

It's Alright

311

Stay with me, here with me
Right in this instance, not in the distance
When your head is off in future time
That's the place when things get out of line
Taking in this moment your time is so well spentIt's alright
Wherever you are right now
I tell you it's alright
That's where you're supposed to be nowStay with me, here with me
Right in this instance not in the distance
Standing at a crossroads, I was at a loss
Those temporary moments, pleasures that are stolen
Here in the present your time is so well spentIt's alright
Wherever you are right now
I tell you it's alright
That's where you're supposed to be now
That's where you're supposed to be nowA song, one song could end a war, could end the war
A song, one song could end a war, could end the warIt's alright
Wherever you are right now
I tell you it's alright
That's where you're supposed to be nowIt's alright
Wherever you are right now
I tell you it's alright
That's where you're supposed to be now
That's where you're supposed to be now
