

Living In My Head

Jonathan Clark

Every night, when I lay down
I close my eyes and I think of you, but you're not around
So I drift away, to another place
And I wanna stay cause it all comes back
When I see your face
But that's just a dream, living in my head

And if I could dream on forever
And you never had to leave
Then we could be in love together
But that's just a dream
That's just a dream, living in my head

Just give it time, and time will heal
So they say, but they don't know cause they don't feel
The way I feel, when you're not around
And the thought of you without me there, brings me down
So I'll just go on living in my head

And if I could dream on forever
And you never had to leave
Then we could be in love together
But that's just a dream
That's just a dream, living in my head

And if I could hold you again
Then the sun would have to shine
And I would feel alive again, cause I've been dyin'
Living in my head

But there's a way, that I can still love you
Cause in my dreams there are no tears and you love me too
So I'll just go on living in my head
Yeah that's my dream
Living in my head
Just living in my head
