Oblivion

Grimes

And now the walk about, after dark
It's my point of view
If someone could break your neck
Coming up behind you, always coming and you'd never have a clue
And now the look behind, all the time
I will wait forever, always looking straight
Thinking, counting, all the hours you wait
See you on a dark night
See you on a dark night
See you on a dark night
See you on a dark night
And now another clue, I would ask

If you could help me out
It's hard to understand
'Cos when you're running by yourself
It's hard to find someone to hold your hand
And now it's good to be tough on me
But I will wait forever
I need someone else to look into my eyes and tell me
Girl you know you gotta watch your health
To look into my eyes and tell me
La la la la la
To look into my eyes and tell me
La la la la la
La la la la la
La la la la la
