## **Scalding Hail**

## **Cannibal Corpse**

Flying chunks of hot debris rushing through the air Vapors causing blisters eyes blinded by the glare

Clouds that shower death hell falling from the sky

Searing rain of molten rock, flesh begins to fryBurning fragments, steaming stones tearing through my skin Lodging near my organs, I'm burning from within

Parts of human bodies lay strewn on the ground

Survivors holding bleeding ears, deafened by the soundBlackened heavens down a mountain's weight

Of rock on top of us

Churning earth has somehow come to life

Rapid combustion spewing magma cracks apart the crust

Tornadoes of caustic steam ravaging the earthScalding hailCharred and battered victims crying to be saved Falling on deaf ears the earth is now our grave

Devastating torrents acid drowns the land

No relief from scalding hail burning like a brandPeople shrieking as they die, pounded by the hail

Splintered shards, heated rocks stabbing like a nail

Millions have been slaughtered as the boiling torrent falls

Apocalyptic storm, judgment for us all Scalding hail
