Far Away

Brainstorm

Been a long time coming failing you
Face the truth, when you're by my side
Choose to be blind, change your mindI lose my way but still you understand
Just hold my hand, always be so sure
Can't you ignore, drowning in, in a heartacheAimlessly rushing leaves you with nothing, you need me
I know where I'm going to, gonna take me there to you
Nothing more to doSo far away from me, something's comin' over me
So far away from me, be forever, the man I should beAnother dawn is yet to come
Carry on, the night has just begun
Troubled days have come and gone
How can I prove that I've done nothin' wrongAll that I want and it's plain to see, don't blame me
When the moon gives its lightWhat takes me down to hell
Church of dreams, they ring the bell
Hopeless souls, let you down
Throw my heart in the wishing wellSo far away from me, something's comin' over me
So far away from me, be forever, the man I should be
