

One Day Without

[Keren Ann](#)

One day without you, without you, my love
One day without you, without you, my love How I long for your skin
And my lips barely grin
And the day must begin, my love Can't imagine your face
In a far hidden place
Please be home before grace, my love One day without you, without you, my love There's a road far ahead
Many things to be said
For the young newly wed, my love And the day is like a year
When you're no longer here
I just wanna be near my love How I long for your skin
And my lips barely grin
And the day must begin, my love Can't imagine your face
In a far hidden place
Please be home before grace, my love One day without you, without you, my love
