

Heavy Fruit

He Is Legend

I spoke your name on the wind
in fireflies and pollen
when those flowers died
all of us cried
now we're shaking you BabyThe pedals they fall where they may
the scene was a sad display
You thought you could hide
somewhere inside
You're faking it BabyThat's news to me
Real bad news to me
Black Blue and Green
it only goes skin deepThe breeze blew you miles away
your seeds settled down in the clay
the hunt carried on
we wrote a song
to remember you BabyMaybe we'll search again soon
when you finally come into bloom
when no one's around
open your mouth
say something BabyThat's news to me
Real bad news to me
Black Blue and Green
it only goes skin deepi can see you've finally taken root
What's taken you so long to get your head out of the ground
promising many Heavy Fruits
i know you're terrified but i'm the only one around
