

Christmas Eve With You

Lindi Ortega

You're the burning ember of this bitter cold December

You're a little flicker in the dark

Fills me with desire

Starts a little fire in my heart

You're love is bound to hinder

The deep freeze of this winter

So I'm inclined to say just let it snow

You will come to meet me

Somewhere underneath the mistletoe

Hurry swiftly to my door

I can't wait here anymore

I just want to hold you close to me

If there's bound to be a storm

I know I'll be safe and warm

On this Christmas Eve with you

Sleigh bells will be ringing

My heart will be singing

A little tune that I wrote just for you

Something sweet and tender

Something you'll remember when it's June

So Merry Christmas baby

I'm glad you're gonna save me

From another lonesome holiday

You'll be here beside me

Melting all the loneliness away

Hurry swiftly to my door

I can't wait here anymore

I just want to hold you close to me

If there's bound to be a storm

I know I'll be safe and warm

On this Christmas Eve with you
