Where Is Our Love Going

Ash

There's a star in the night sky
Brings you to my sight
Despite all our earthly fears
Still looking in your eyesThere's a chill in the night air
Brings us closer together
We'll give up without knowing
Where is our love going?Future is a sea of lies
The future is a mass of shade
Dreams that you soon forget
Dreams waiting to be madeThere's a star in the night sky
Brings you closer to my side
We'll give up without knowing
Where is our love going?There's a chill in the night air
Brings us closer together
We'll give up without knowing
Where is our love going?There's a chill in the night air
Bringing lovers together
We'll give up without knowing
Where is our love going?There's a star in the night sky
Brings you closer to my side
We'll give up without knowing
Where is our love going?There's a chill in the night air
Brings us closer together
We'll give up without knowing
Where is our love going?
