

# Walk On Water

Hollis Brown

If you walk on water you got to be willing to drown. If you  
walk on water you got to be willing to drown. My car was on  
the highway, gas tank it was low, at \$5.15 for gasoline  
there's a rising death toll. A car bomb on the road,  
waiting to explode, if you miss this one then maybe the  
next one will break your mold, or you'll lose your sight.  
The desert in the night. If you walk on water you got to be willing to drown. If you  
walk on water you got to be willing to drown. Mr.  
politician, aimed at recognition, it ain't your blood  
that's being spilled, you're office is air conditioned. The  
housewife in the kitchen, cancer in remission, just got  
word that her husband was shot down during his mission. It  
just ain't right, the desert in the night. If you walk on water you got to be willing to drown.
